

VULCAN®

LONG LASTING, ROBUST AND ECONOMICAL

 ELECTRIC

| 250L - 315L CAPACITY

| 10YR WARRANTY†

THAT'S VULCAN® VALUE

High quality and performance at a very affordable price. Three good reasons why Vulcan is such a popular choice for reliable water heating.

Vulcan is built with the best: Quality materials and leading edge technology combine to make Vulcan ready for year after year of reliable hot water service. Colorbond® steel jackets, which are both weatherproof and corrosion resistant, protect against our harsh climate.

Vulcan has backup: If you ever need a spare part for your Vulcan it's good to know they are readily available across the country and can be serviced by most plumbers or electricians. The Vulcan Warranty† covers the cylinder for a full 10 years for Department of Housing installations. (A new water heater will be supplied in accordance with the terms of the warranty if the cylinder fails within 10 years). Every Vulcan 6H1250 and 6H1315 water heater also comes with a 12 month warranty on parts and labour.

Vulcan's inside story is just as strong: A ceramic lining is bonded to the inside of the cylinder providing long life protection against the varying water conditions found across Australia.

Vulcan is tough: The Vulcan storage cylinder is made from specially formulated steel tough enough to withstand varying water and heating cycle pressures.

VULCAN®

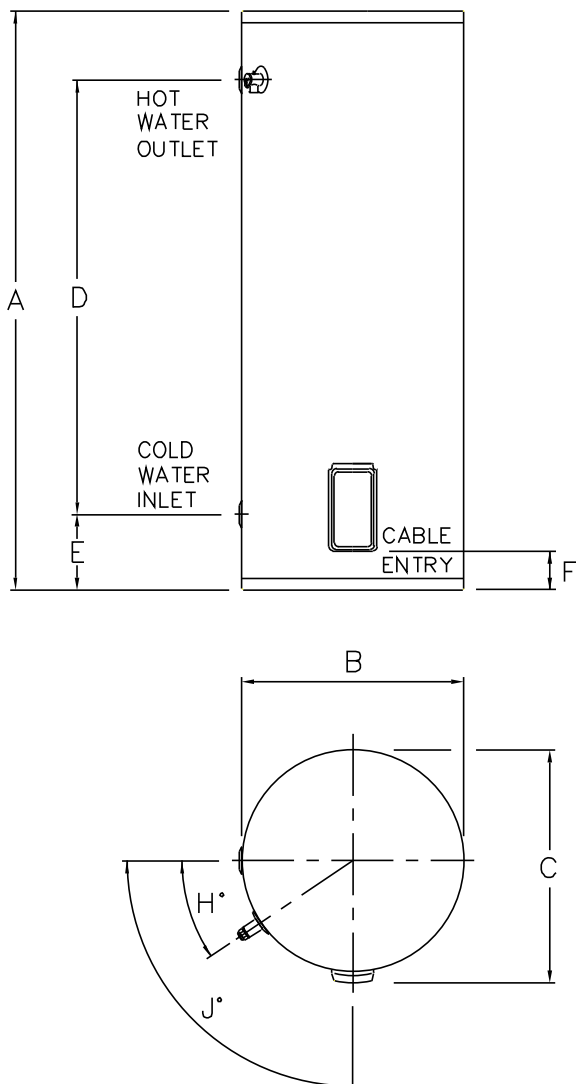

FORGED TOUGH

HOW TO CHOOSE THE RIGHT VULCAN®

Your Vulcan will be living with you for a long time, so make sure you select the one to suit your needs.

Take into consideration appliances, such as washing machines and dishwashers, which can use as much hot water as one person. Also allow for family additions and don't forget – small children grow into large teenagers.
